

## The Last Control System You'll Need

Get more control®

Simple, intuitive control over today's advanced technologies... **Pro Control** provides completely customizable products to control the environment.

**Pro Control** makes it possible to control: music from an iPad, iPhone, iPod Touch or PC; lights from another room or another city from a tablet, smart phone or computer; heating and cooling any room without even getting up.

**Affordable Price Points**  
**Technologically Advanced**  
**Focused Product Line**

### Get More Control with Pro Control

Bridge the gap between price and performance with **Pro Control**. The **Pro24.r** and **Pro24.z** remote controls provide intuitive control over complex electronic systems, combining one-touch simplicity with robust capabilities.

These systems feature brilliant LCD color touchscreens, sleek designs and advanced wizard-based programming software.

### What Make Pro Control so Now and Future Proof?

**Pro Control** systems go far beyond the typical remote control concept, providing apps for iPad, iPhone, iPod Touch and computer control as well. This means home control is beyond the home!

No Remote? On the road? The **Pro Panel App** allows control and monitor processor from any PC running Microsoft Windows with full two-way feedback.

#### The Pro Control software allows for numerous control actions:

- Movies and pictures in any room from multiple sources
- Lighting in any room or outside, controlled from the road or at home
- Thermostat heating and cooling
- Music on iPad, iPod, iPhone or iTouch with artist and track feedback

**Pro Control** fills your world with music, passion and light. Select music to fit the mood with feedback from your Smart Phone, Tablet, A/V receivers and even from your PC! Or set the perfect mood for movie night with just the right lighting and temperature.

### Two-Way System : Ultimate Pro Control System, Value \$900
